- Attach outdoor blinds to complete an enclosure
- Pergola can be supported with Stainless steel cables or freestanding pergola structures are also available.

Our intelligent retractable roof systems are a great way to increase your living space, with up to 150m² of protection at the push of a button.

Engineered with state of the art European technology and elegant design features, your retractable roof will stand up to the harsh environment. Components are manufactured from high grade aluminium and stainless steel paired with a top quality PVC membrane skin.

Operation is simple thanks to industry leading Somfy automation. The membrane skin is easily retracted or extended by remote control with options such as Sun & wind or rain sensors.

LED lighting, infrared heaters or outdoor blinds are easily installed to make your space into an all season's alfresco experience.

Increase your business capacity and revenue by turning your open outdoor space into a complete enclosure at the push of a button.
